## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a wobble plate rotation prevention mechanism of an axial piston machine, classified in class 74, subclass 60.
- II. Claims 7-12, drawn to a compression ratio control mechanism of an axial piston machine, classified in class 60, subclass 445.
- III. Claims 13-15, drawn to a connecting rod with piston arrangement of an axial piston machine, classified in class 92, subclass 187.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as in an axial piston machine with universal joints and no compression ratio control mechanism. In the instant case, invention II has separate utility such as in an axial piston machine with universal joints and no rotation prevention mechanism. In the instant case, invention III has separate utility such as in a axial piston machine with no rotation prevention mechanism and no compression ratio control mechanism. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and the search required for one

Art Unit: 3745

invention is not required for the other inventions, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
